----CONDITION OF THE DAM AT KILBOURN Cirx.-Last summer the water was shut from the slide, and the slide cut down some three feet, shortened, and altered generally, according to a plan agreed upon by the company and lumbermen. Still there seemed to be trouble in running lumber over it, in the fall, and in the winter the lumbermen, after preliminary in-etings, proceeded to out the slide still lower, removing it nearly to low water the whole width of the slide inches water the whole width of the slide; including the gunwales. This drew down the top of the dam bare, in low water, and they ent off that amount, reducing the fall to four for or four feet and a half. That is now the state of the dam, and we hear no compisint in regard to running lumber over it. We sincerely hope it is in a condition to do no more damage to lumber, whatever the legal rights of parties may be.

THE FISHING FLEET OF KENOSHA.—There are eight companies now established in Ke nosha, with all the appliances for taking the fluny tribe. Each company owns a light, trim and fast-sailing yacht, and when they are all in the harbor at once they form a very gallant little fleet. The amount of fish caught is estimated at about five tons per week, the greater share of which is sold fresh in the Chicago market at three dollars per hundred

The South should not seem to be divided by a mere circumstance of this character. The secedars are urged to forego any action at Richmond, and to go into the Convention at Richmond, and to go into the Convention at Battimora, where the united South should make another effort to have their constitutional rights recognized. Should they fail, they can take such action as duty and honor may seem to demand at their hunds. The "Old Gentleman's Party."

The "Old Gentlemen" who met in Convention at Baltimore, on Wednesday last, nominated John Bell, of Tennessee, and Edward Evarett, of Massachusetts—both veteran Whigs—as their candidates for President and Vice President of the United States.

Special Dispatch to the New York: Times.

Washington, May S.

It is said that the President will not wait for George Sanders to resign, but will decapitate him forthwith. George's telegrams from Charleston drove our Chief Justice nearly frantic, partly because they were inconedvably impudent, but making because they were not prepaid. One of them was nearly in the following words:

"His Excellency James Buchanan, President of the United States:

"His Excellency James Buchanan, President of the United States."

The "Old Gentlemen" who met in Convention at large.) Douglas will be nominated John Bell, of Tennessee, and Edward Evarett, of Massachusetts—both differs from you in opinion, but never decives you.

Gronge Sanders to resign, but will decapitate the President of the United States.

differs from you in opinion, but never decives you.

George Sanders!

For this delightful epistle the President was obliged to pay \$28 telegraph toils. For similar information Secretary Cobb paid \$14, and Senator Toomis \$12. George says, in explanation, that all these men can afford to pay for important news, because they are rich; but he prepaid all he sent to Olingman and other poor devils who support Douglas.

The only thing that makes George unhappy is that he is obliged to wear his official head so long. He is anxious to relieve the Administration from all embarrasment on his account, and would resign, but that he fears it would look like deserting his old friends in their extremity. He indulaes the hops, however, that they will speedily be able to dispense with his official services. When they do, look out for disclosures.

As the Chairman of the State Cen-tral Committee was at the time in Charleston tral Committee was at the time in Charleston acting in the Convention of the Constitutional Democracy, it is rather strange that he should have telegraphed pledges of the State to Dougles, to Washington City or elsewhere. Wheever they may be from however, must chairman of the State Central Committee. Whoever they may be from, however, must have the credit for a very poor hoax or a very impudent assumption. It is just possible that a journal now-a-days may be independent without abusing somebody, although it is barely possible that such a paper will please the certain class that prefers abuse to everything else. There is no reason why a newspaper cannot subserve the best interests of a community, without throwing its influence into the scale of every new clique, and hastily condemning every new opposition. Differences of opinion ought to command respect, and where a palpable wrong is about to be committed, it is not al ways the most independent way to "slash" indiscriminately, however aratifying such an exhibition may be to certain readers. But in the two weeks of 1809, which we have to compare with the two months of 1859, we have received 1,953,011 bushels; an increase of 469,551 bushels. A CAPTAIN AS IS A CAPTAIN,-Mr. DRURY, the Corresponding Secretary of the Editorial Association, publishes the following letter from Capt. Doub, of the Berlin City, which sufficiently explains itself to all ye editors of the State:

Lu. II. Druny, Sir:—Mr. Robinson has just informed me that the Editorial Convention for the State is to be held at Green Bay sometime in June, and in order to assist the fraternity as far as possible in "having a good time," I authorize you to issue free papers on the steamer Berlin City, to all editors who may desire a passage on my bo at, to attend said Convention.

SENTIMENT ON THE WESTERN RESERVE. A letter from Cleveland says: "There is much discussion here on the subject of the nominations sought to be made at Chicago.-Notwithstanding many of the Ohio Republicans would be glad to honor Gov. CHASE, yet the feeling, even here, seems to be that Gov. SEWARD is the only man that can marshal the Republican hosts and lead them on to certain victory."

SURVEYOR HART'S EXODUS .- The Tribune says that Mr. HART's real motive for his andden exodus to Europe was an apprehension of being summoned before the Covode Committee. Evidence to that effect, and involving others in the same course of evasion, will be submitted to the House for its order

It is quite clear to us that, if the seceding Dologues rejoin the "rump" at Baltimore, Mr. Charleston and the probable result of the adjourned sitting at Baltimore, leaving our readers to draw their own conclusions. It is quite clear to us that, if the seceding Delegates rejoin the "nump" at Baltimore, Mr. Bort clear country by the Baltimore, Mr. Bort clear country by the Baltimore and there; and it is equally apparent that if their places are filled with other delegates, manufactured to color by the partisans of the "Little Giant," his nomination will be secured of course. The decision, though not wholly unexpected, caused much excitement in money circles yesterday. The parvalue of the shares of the Company is \$830, but they have sold as high as four or five thousand dollars; they had latterly, however, receded to about \$600, but during the progress of the argument a few weeks ago, again advanced to about \$600, at which considerable sales were made; since then rumors of an adverse decision have caused a rapid decline, and yesterday, before the decision days caused as rapid decline, and yesterday, before the decision sgain advanced to about 5000, at which con-siderable sales were made; since then rumors of an adverse decision have caused a rapid decline, and yesterday, before the decision was known, sales were made at \$75 per share. The Company own some other prop-erty, the title to which is undisputed, and the shares, therefore, are not altogether worthless. A favorable decision would have or Chase, and such like liberal and progressive Republicans, to Mr. BATES. Discovery of the Negro after five days Confinement in the Coat-Hote - Little Food-No Water. Correspondence of the New York Herald. About haif past one o'clock this (Sunday) morning one of the firemen of the Spaulding, named Patrick Daley, was hard at work shovelling coal into his furnace, when the heap tumbled down, and the legs of a buman being appeared to his startled vision.—

The place was dark and close, but there was sufficient light from the furnace fires for him to see that there was a human body there, dead or alive. Supposing that some of his was a fortunate thing for Heenan that the

When the negro appeared on deck he was a truly pitiable object. He wore an old slouched felt hat, with very broad brim, turned up in front. His garments afforded evidence of the noisome and dirty character of his place of confinement, and were bestmeared and beamutted all over. His eyes were bloodshot, and restless and piercing as a snake's. His leatures were of the African type, flat nose, big lips, but not unusually so for the race. He had a black moustache, and his chin was covered with a beard of short length. He seemed like a plantation negro length. He seemed like a plantation negro who had seen hard service, and wished to taste a bit of the free air of the North.

Air. Atkins stepped into the small boat, as she was awinging by the devite, and ordered the negro to follow him. The negro did so, and seemed alarmed at the possibility of falling overboard. He was seated near the stern sheets; two or three of the steamer's crew took their places with the oars. THE STEAMERS.

The Wheat Chop is Omo.—The Dayton Journal of the Other in the Other in the Day Country of the Wheat in the western part of this country does not look well; indeed, some farmers are plowing up their wheat fished for corn. In adjoining countries the wheat is represented as "spleadid." From the cet "all and northern parts of the State, where the wheat was frozen last June, we have the most encouraging so-counts of the growing group.

Southern Demand for Bersdetuffs.—The Clincinnai Gazette of Thursday says:

Southern Dexind for Bersteitffr.—The Uncinnati Guestie of Thuredaysay:

There was a heavy demand for Flour to-day—not speculative, but mainly for export the South. A dealer from Georgia bought about 4,000 bils of the 6,600 bils soid. There is a scarcity of flour in that State, and also in portions of Tenesses; and in addition to light supplies, the growing wheat crop, it has been satisfactorily ascertained, is a failure. In many places the yield will not replace the seed. That section of country may therefore be expected to need a large quantity of flour from the West, for a year to come—Holders met the demand freely, and no advance was established in prices. The demand was allogether for extra brands, and chiefly for the highest grades. Low extras were dull, and for superfine there was but little demand. Frices range from \$5,70 to \$6,10 for common extra to fancy white wheat: Superfine may be quoted at \$5,65. The receptis were only 150 bils agains 1,730 bils exported. There is also some demand for corn from Georgia. Prime white, shelled, brought 50c in bulk, and 61c in sacks. Ear rold at 45@49.016 bulk, and the following was find to be

The Passet in Illinois,—The following we find in the Cincinnail Price Current;

Naples, Ill., May let.

Not having seen any report in your valuable paper of the growing crop in this section of the country, we thought we would give some information on the subject.

As to the winter wheat, (we raise but little spring,) we might call it a total failure in the following counties: Huncock, Adams, Pike, Brown, Scott, Morsan, Sangam in, Maccapin, Green and Jersey. These counties in former years have been our best wheat counties in the State. We can safely say that in the counties mentioned, there will not be eauly wheat roised in furnish bread for the people, and some counties not the read. There was some spring wheat sowed, but is along poorly, on account of the drouth that is now prevailing. Such a drouth has never been known here at killed by the late frost. Altogether, things look gloonry with us. There is and will be a large crop of corn planted, but that which is planted now can not germinate until we get rain.
